2009 SOCR WORKSHOP

Workshop on Technology-Enhanced
Probability and Statistics Education Using SOCR Resources

The 2009 SOCR training, development and continuing education workshop aims at demonstrating the functionality, utilization and assessment of the current SOCR (www.SOCR.ucla.edu) resources for IT-based probability and statistics education. This workshop will be of most value to AP teachers and college instructors of probability and statistics classes who have interests in exploring and acquiring hands-on experience in novel IT-based approaches for enhancing statistics education. The workshop will provide an interactive forum for exchange of ideas and recommendations for strategies to integrate computers, modern pedagogical approaches, the Internet and new student assessment techniques in statistics education. The space is limited to 35 attendees, who will be partially supported to attend the 2009 SOCR workshop.

To apply, complete the web application form (URL below)
