2010 SOCR AP Statistics Workshop

An intense 1-day Continuing Education Workshop for
Advanced Placement Statistics Instructors using SOCR Resources

The 2010 SOCR Advanced Placement (AP) training, continuing education and development workshop will demonstrate the functionality, utilization and assessment of the current SOCR resources in the AP statistics curricula. The SOCR Motto *It's Online, Therefore it Exists!* clearly indicates that all of these tools, activities and materials are freely available over the Internet to the entire community. This workshop will be of most value to AP teachers and college instructors of probability and statistics classes who have interests in exploring novel technology-enhanced approaches for statistics education. The workshop will provide an interactive forum for exchange of ideas and recommendations for strategies to integrate computers, modern pedagogical techniques, the Internet and new student assessment techniques.

To register send an email to SOCR@stat.ucla.edu, include your CV/Biosketch and a short descriptions of your background, AP statistics interests and teaching role (including courses you expect to teach in the next few years). We will make any effort to invite as many people as we can physically accommodate. Women, minorities and persons with disabilities are encouraged to apply. All applications received before July 15, 2010 will receive full consideration.
